

Analysis

Let us get to the fun part of a Data Analyst's job.

Dog Types:

Retweets:

We see that an Eskimo dog has the highest number of retweets on an average.

Just so we know the dogs, I am going to put the pictures of the top 3 dogs:

Rank 1 American Eskimo Dog

Did you know? American Eskimo Dog originated in Germany.

Rank 2 Cardigan Welsh Corgi

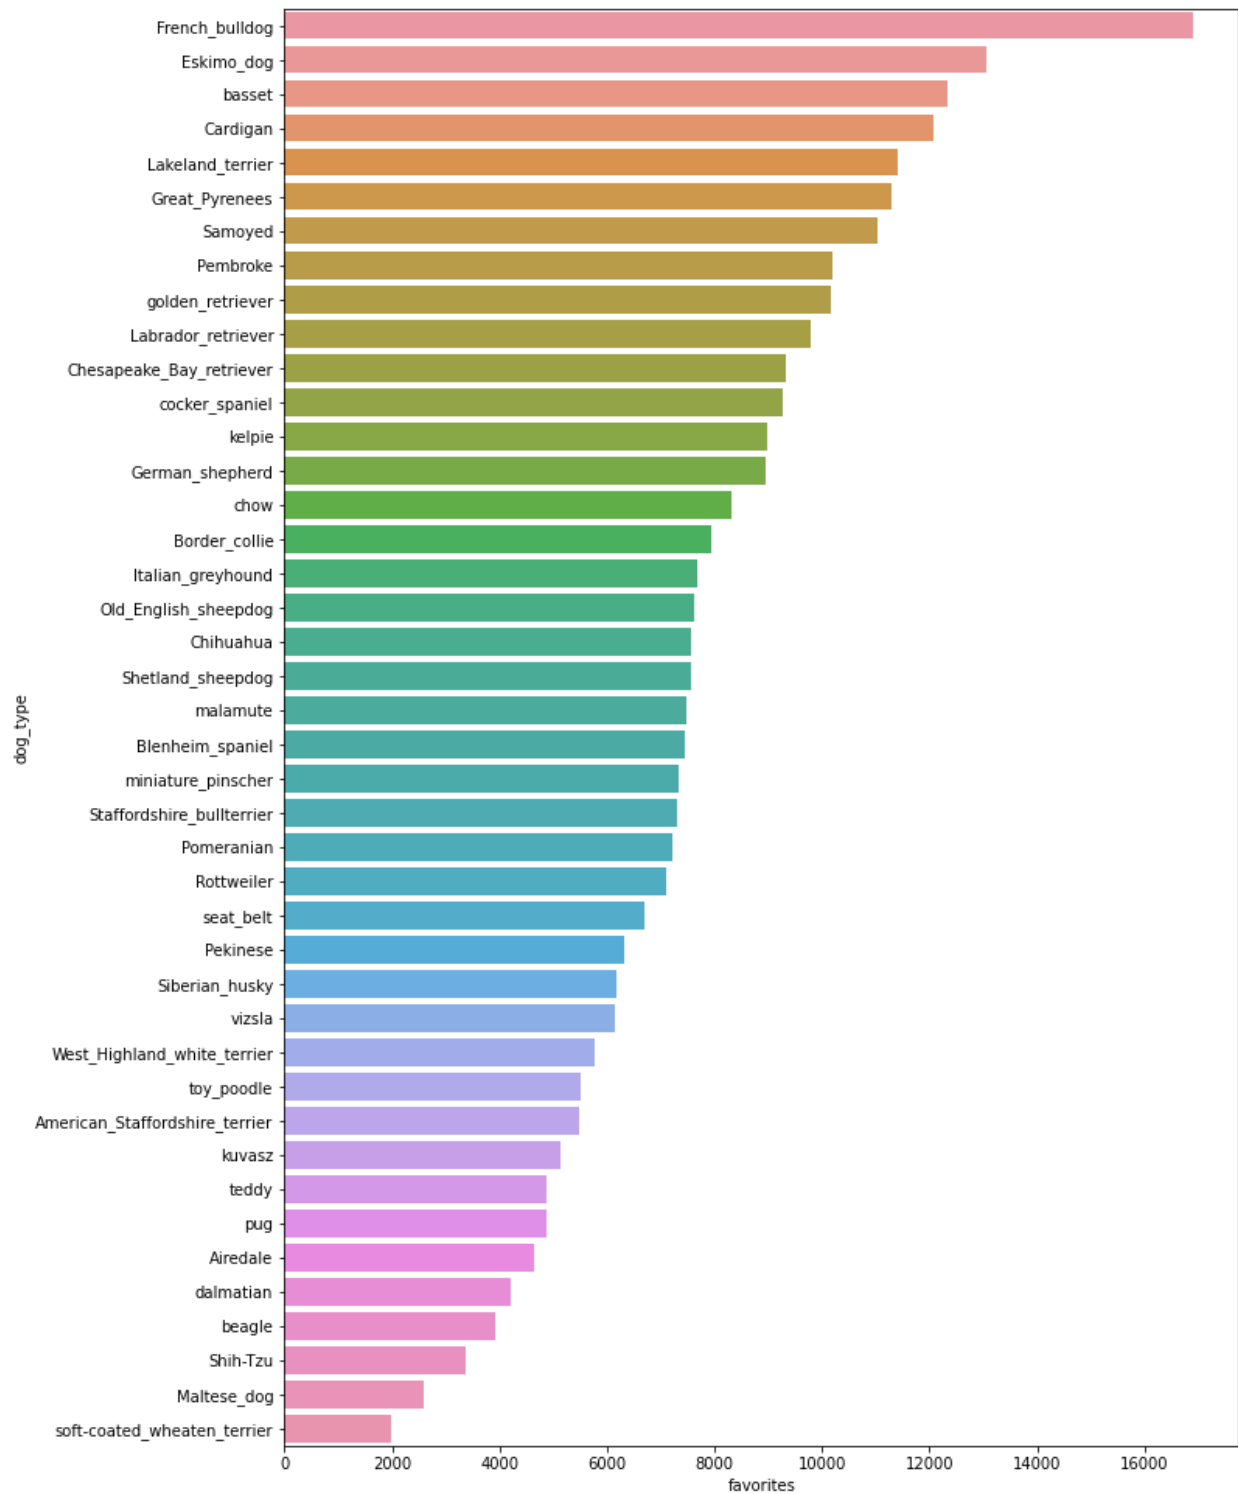

Did you know? They Have Been Known in Their Namesake Land for More Than 3,000 Years

Rank 3 French Bulldog

Did you know? French Bulldog cannot swim.

Favorites:

We have a new entrant for the podium, the Bassette.

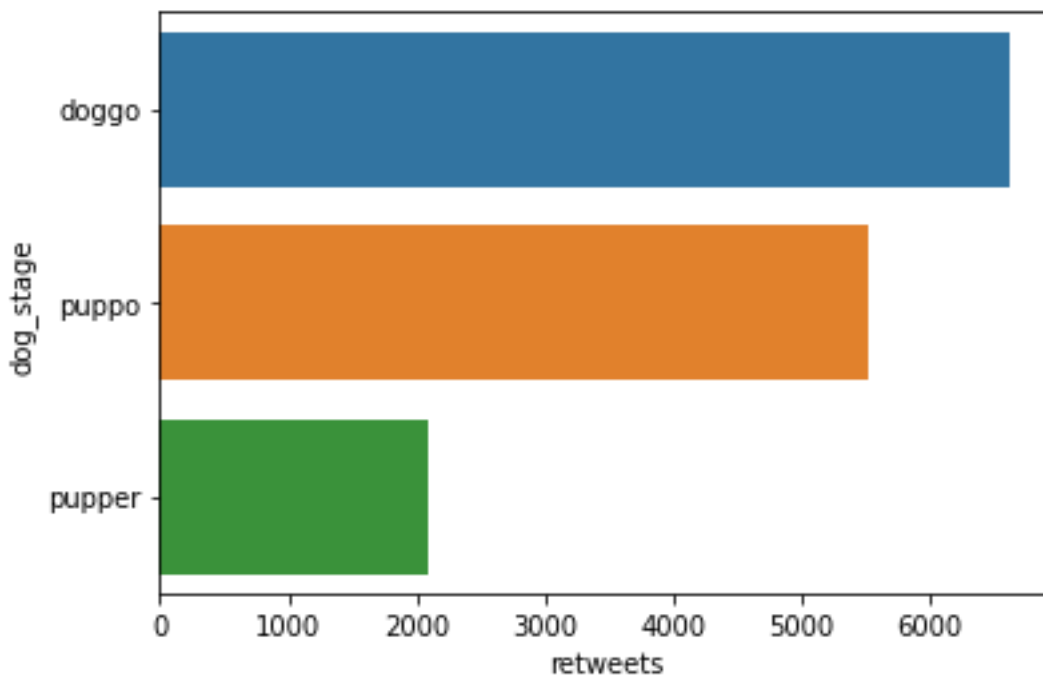

Favorite Rank 3 Basset Hound Dog

Did you know? They were bred to hunt! I did not expect that. Probably bred to hunt hearts! :D

Dog Stages:

Retweets:

We all love a good doggo and that's why we see higher number of retweets on an average for doggo followed by puppo and then pupper.

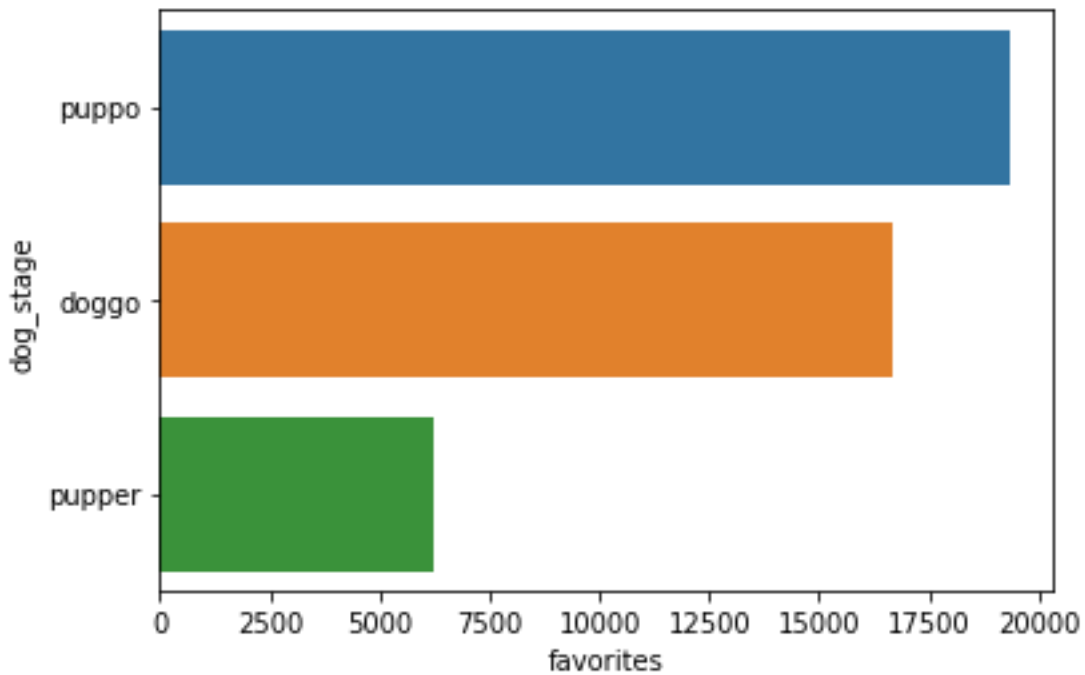

Just for the readers knowledge, following are the definition of the various dog stages:

Doggo: A big pupper, usually older. A pupper that appears to have its dog life in order.

Pupper: A small doggo, usually younger. Can be equally if not more mature than some doggos.

Puppo: A transitional phase between a doggo and a pupper. A dog with a mix tendencies of both doggo and pupper.

Favorites:

We all love that transitional phase, where the dog is cute and knows where to poop. :D
